Registration/Check-In & Continental Breakfast begin at 8:00 AM

Morning-General Session:

Speaker: Joseph D. Grandinetti, Jr., Esq.

Description: “Document Retention Policies: A Business Necessity.”

What has been the influence of Sarbanes-Oxley, Arthur Andersen, litigation and discovery, and legal compliance requirements on recordkeeping and records retention programs? What legal principles affect all records, paper records, electronic records, electronic images and other reproductions of records? How does today’s technology effect what is a record?

Joseph D. Grandinetti, Jr. Esq., is founder and owner of Technology Counselor www.technologycounselor.com, a Northern Virginia-based consulting firm which assists government agencies, businesses and law firms with technology related issues, specifically in the development and implementation of Document Retention Policies and Information Security as it relates to records management.

With over 30 years experience, Mr. Grandinetti, Jr., also provides services to lawyers, law firms, government agencies and businesses in the management, organization, storage and retention of their files, records and electronic data.

Greater Baltimore Maryland Chapter – ARMA International

Speaker: Mark Seamans, Executive Vice President and Chief Technology Officer, FileTek

Description: “Technology Strategies for Mitigating Litigation Risks.”

Mark Seamans' is FileTek's www.filetek.com Executive Vice President and CTO serving as the key communicator regarding the company's vision and direction. With over 20 years of experience in the design, development and delivery of enterprise software solutions, In addition to his work with FileTek, Mark's experiences as divisional CEO for the Cardiff business unit of Autonomy - a worldwide leader in pan-enterprise search and meaning-based computing technology, Senior Vice President of R&D at Verity - a NASDAQ listed company focused on enterprise search and automated information processing, and CTO and board member of Cardiff Software, give him the unique credentials, knowledge and communication skills to link today's available technologies to the most pressing and highly-valued customer requirements.

Learn more about innovative, best practices approach to records management that also pro-actively empowers organizations to access key information, fulfill their legal obligation to preserve critical content maintain a proper custodial chain throughout the content lifecycle.
